# manta II™ The benchmark pool cleaner for simply-shaped pools.

## ► manta II™: FOR USE WITH WHAT TYPES OF POOL?

<b>POOL</b>	In-ground pools.	
<b>SHAPE</b>	Rectangular or oval.	 
<b>BOTTOM</b>	Flat or gently sloping bottoms.	 
<b>SURFACE</b>	All types of pool surfaces (tiled, liner, polyester skin, reinforced PVC, painted concrete).	

## ► manta II™: ITS FUNCTIONING.

The Manta II uses a filtration system as a source of energy. Easy to install, it connects to the skimmer or the suction point without any need for additional equipment. The power from the pool's pump enables it to move around automatically and at random, to suck up debris, which is then stored in the pump basket and filter.

**DIAPHRAGM**  
ORIGINAL BY ZODIAC

### The "Diaphragm", exclusive technology by Zodiac, moves a step further for the very best cleaning results.

By inventing the Diaphragm, the motor component of hydraulic-suction pool cleaners, Zodiac revolutionised the swimming pool industry. This system is the result of exclusive expertise and know-how, and confers unique features to automatic pool cleaners: high-speed mobility, exceptional suction capacity for all types of debris, highly efficient even with low output pumps used in smaller pools, and super-silent operation.

But this technological gem has more to offer... Today, Zodiac improves the system and creates the "Long-Life Diaphragm", offering enhanced reliability thanks to the use of highly durable materials. Who else other than Zodiac, the pioneer of this technology, could go to such lengths to ensure maximum comfort for swimming pools?
